PROFESSIONAL / PRACTITIONER DATA SHEET

Infuse Bioactive Hydrogel Mask

Radiance, hydration and revitalizing support in a professional hydrogel mask featuring a DNA complex, niacinamide, collagen and skin-conditioning actives.

PROFESSIONAL POSITIONING

An advanced hydrogel facial treatment featuring polynucleotide (Sodium DNA), niacinamide (NAD+), hydrolyzed collagen, hyaluronic acid and a comprehensive amino acid complex to support visible skin revitalization, radiance and hydration.

Designed as an in-office adjunct treatment and for at-home maintenance when appropriate within the provider's protocol.

RADIANCE	HYDRATION	SKIN QUALITY
Niacinamide + Sodium DNA support a brighter, revitalized appearance	Hyaluronic acid, collagen and amino acids support moisture retention	Supports firmness, elasticity appearance, pore refinement and barrier conditioning

KEY FORMULATION COMPONENTS

- Polynucleotide (Sodium DNA) - supports skin renewal, vitality, conditioning and hydration retention.
- Niacinamide - supports radiance, more even-looking tone, barrier function and reduced appearance of enlarged pores.
- Hydrolyzed Collagen - supports surface hydration, softness, moisture retention and smoother-looking texture.
- Sodium Hyaluronate - hydration and moisture-retention support.
- Amino Acid Complex - supports Natural Moisturizing Factor (NMF), hydration, barrier conditioning and skin resilience.

CLINICAL APPLICATIONS

Appropriate as a cosmetic adjunct following:

- Hydrafacial® treatments
- Dermaplaning
- Microneedling / RF microneedling
- PRP facial procedures
- Brightening facial protocols
- Cosmetic maintenance and hydration programs

FORMULATION PROFILE • 20 g / 0.70 oz each • 4 facial masks per box • Fragrance-Free • Paraben-Free • Sulfate-Free • Dermatologist Tested • Designed & Developed in the USA

PROVIDER PROTOCOL

How to integrate Infuse

A radiance-forward cosmetic treatment step for the treatment room and between-procedure home care.

1	**PREP**	Cleanse skin thoroughly. Complete the planned aesthetic procedure according to the provider's protocol.
2	**APPLY**	Open pouch and position mask evenly over the face, avoiding eyes and lips.
3	**INFUSE**	Leave in place for 20-30 minutes. The hydrogel matrix provides consistent full-face contact with a cooling, soothing experience.
4	**FINISH**	Remove mask and gently tap or massage remaining essence into the skin. Follow with an appropriate ReVia Well reparative serum if desired.

EXPECTED COSMETIC BENEFITS

- Boosts radiance and supports skin luminosity
- Supports firmer-looking skin and elasticity appearance
- Refines the appearance of pores and supports barrier function
- Delivers immediate and lasting hydration
- Supports a brighter, more even-looking complexion
- Enhances the cosmetic recovery experience post-procedure

HOME-CARE GUIDANCE

Use 1-3 times weekly or as directed by the skincare professional. Apply to clean skin for 20-30 minutes; tap in remaining essence after removal.

PRO TIP

For enhanced results, layer with an appropriate ReVia Well reparative serum to support skin hydration and radiance.

PRODUCT INCI

Water, Glycerin, Chondrus Crispus, Polyurethane-35, 1,2-Hexanediol, Hydroxyacetophenone, Niacinamide, Sodium Hyaluronate, Hydrolyzed Collagen, Butylene Glycol, Sodium DNA, Pentylene Glycol, Adenosine, Sodium Lactate, Serine, Glycine, Alanine, Valine, Isoleucine, Leucine, Proline, Arginine, Aspartic Acid, Glutamic Acid, Threonine, Lysine, Histidine, Methionine, Tryptophan, Cystine, Tyrosine, Potassium Hydroxide, Citric Acid, Sodium Citrate, Phenoxyethanol, CI 12490, Caprylyl Glycol, Benzoic Acid.

PROFESSIONAL USE NOTE	For external cosmetic use only. Discontinue use if irritation occurs. Do not use on broken or damaged skin. Avoid direct eye contact. Keep out of reach of children. Store in a cool, dry place away from direct sunlight.

Healthcare Professional Disclaimer. This sheet is intended for licensed healthcare professionals and skincare professionals for educational and product-information purposes. Infuse is a cosmetic product and is not intended to diagnose, treat, cure, or prevent disease. Providers should use independent clinical judgment when determining whether and when a cosmetic product is appropriate following a procedure.
